

Florian Mandija, post-doctorate from Albania, University of Shkodra (TG 1)

Host University: University of Warsaw, Institute of Geophysics, Atmospheric Physics Group

Why did you apply within SIGMA Agile?

- To extend my network of international collaborations.

What did you enjoy most during your mobility at the host university?

- That was a relatively short stay at University of Warsaw. However, the beautiful city entered my very good memories.

The work done there with the other colleagues in the Atmospheric Physics Group was concluded with a publication in an impact factor journal. I'm very grateful to the International Office of the University of Warsaw, which has created all the possibilities for a better and faster adaptation.
